

Get the only hands-on, performance-based cybersecurity certification for advanced practitioners with the NEW CASP+ (CAS-004) exam

CompTIA Advanced Security Practitioner (CASP+) is an advanced-level cybersecurity certification for security architects and senior security engineers charged with leading and improving an enterprise's cybersecurity readiness.

CASP+ is the only certification on the market that qualifies technical leaders to assess cyber readiness within an enterprise, and design and implement the proper solutions to ensure the organization is ready for the next attack. CASP+ certified professionals figure out how to implement solutions within policies and frameworks, not just manage them.

WHAT'S IN THIS VERSION?

With security threats are on the rise globally, organizations are increasingly concerned with effectively leading and managing their overall cybersecurity resiliency. Updates to CASP+ qualify advanced skills required of security architects and senior security engineers to effectively design, implement, and manage cybersecurity solutions on complex enterprise networks.

Lead and improve the overall cybersecurity resiliency with CASP+!

#1 SECURITY ARCHITECTURE

Expanded coverage to analyze security requirements in hybrid networks to work toward an enterprise-wide, zero trust and endpoint security architecture with advanced secure cloud and virtualization solutions.

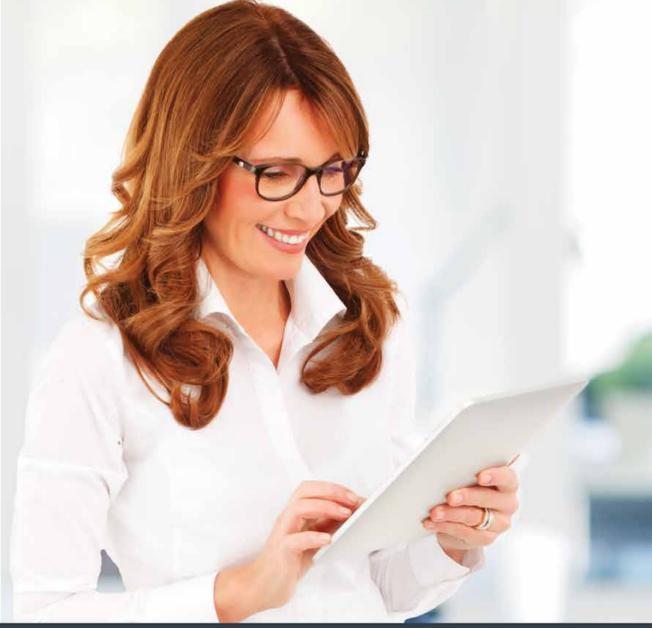

#2 SECURITY OPERATIONS

Includes expanded emphasis on newer techniques addressing advanced threat management, vulnerability management, risk mitigation, incident response tactics, and digital forensics analysis.

#3 SECURITY ENGINEERING & CRYPTOGRAPHY

Has been expanded to focus on advanced cybersecurity configurations for endpoint security controls, enterprise mobility, cloud/hybrid environments, and enterprise-wide PKI and cryptographic solutions.

#4 GOVERNANCE, RISK, & COMPLIANCE

Expanded to support advanced techniques to prove an organization's overall cybersecurity resiliency metric and compliance to regulations, such as CMMC, PCI-DSS, SOX, HITRUST, SOC 2, GDPR, FISMA, NIST, and CCPA.

Ensure cyber readiness with CASP+!

Material covered above is reflective of CASP+ 004.
